### **DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-32, drawn an integrated decision feedback equalizer and clock and data recovery circuit, classified in class 375, subclass 233.
  - II. Claims 33-47, drawn an integrated retimer and phase detector classified in class 375, subclass 373.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions, Group I is related to a transmitter and Group II is related to a receiver.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
